 - By clients in hotels, motels and other residential type environments;
 - Bed and breakfast type environments.
31. Save these instructions.
32. This appliance has been incorporated with a grounded plug. Please ensure the wall outlet in your house is well earthed.

Know your kettle

Before initial use

If you are using the kettle for the first time, it is recommended that you clean your kettle before use by boiling a full kettle of water twice and then discarding the water.

Operation

1. To fill water into the kettle, remove it from the power base and open the lid by press down the lid button, fill with the desired amount of water to the kettle. Always fill the kettle between the minimum (0.5L) and maximum (1.7L) marks. Too little water will result in the kettle switching off before the water has boiled.

NOTE: Do not fill the water over the maximum level, as water may spill out of the spout when boiling. Ensure that the lid is firmly in place before connecting the power cord to the outlet.

2. Close the lid. Position the kettle on the power base in place. Make sure the kettle contact with the power base completely.

NOTE: Ensure the lid is firmly closed. The kettle will spout if the lid is left open.

NOTE: Do not pull the lid when you are pressing the lid button.

3. Lift the kettle from the power base and then pour the water.

NOTE: Operate carefully when pouring the water from your kettle as boiling water may result in scald, besides, don't open the lid while the water in the kettle is hot.

4. The kettle may be stored on the power base when not in use.

NOTE: Ensure power supply is turned off when kettle is not in use.

Boil-dry protection

Should you accidentally allow the kettle to operate without water, the boil-dry protection will automatically switch it off. If this should occur, allow the kettle to cool before filling with cold water and re-boiling.

Care and cleaning

Always disconnect the appliance from the power outlet and leave it to cool down completely before cleaning.

Never immerse the kettle or cord in any liquid, or allow moisture to contact with these parts.

Removal of mineral deposits

Mineral deposits in tap water may cause the kettle interior to discolor. To remove this build-up, use non-toxic Liquid Descaler.

Alternatively:

1. Fill the kettle with 3 cups of white vinegar and the remainder of water and be allowed to stand overnight. **Do not boil.**
2. Empty the solution from the kettle. Any stains remaining inside the spout can be removed by rubbing with a damp cloth, fill the kettle with clean water, bring to boil and then discard the water. Repeat and the kettle will then be ready to use.

Cleaning external housing

Wipe the external housing with a wild and damp cloth or cleaner.

CAUTION: Do not use chemical, steel, wooden or abrasive cleaners to clean the outside of the kettle.

Cleaning the filter

Remember to clean the filter with a wild and damp cloth at intervals.

Storage

When not in use or storage, the power cord may be wound around the cord storage

under the base of kettle.

Environment friendly disposal

You can help protect the environment!
Please remember to respect the local regulations:
hand in the non-working electrical equipments to
an appropriate waste disposal center.
