- TO PREVENT FIRE OR SHOCK HAZARD, DO NOT USE AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE TO PREVENT BLADE EXPOSURE.
- TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

|                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <p>This lightning flash with arrowhead symbol in an equilateral triangle alerts users to the presence of uninsulated dangerous voltage within the products enclosure that may be of sufficient magnitude to constitute a risk of electric shock.</p> | <h4>CAUTION</h4> <p><b>RISK OF ELECTRIC SHOCK<br/>DO NOT OPEN</b></p> <p>Warning: To reduce the risk of electric shock, do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel.</p> |  <p>The exclamation mark within an equilateral triangle alerts users to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.</p> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

This appliance should not be exposed to water and no object filled with liquid such as a vase should be placed on the unit.

#### CAUTION

- Danger of explosion if batteries are incorrectly replaced.
- Replace with only equivalent type of battery.
- Do not expose battery to direct sunlight or any other source of heat.
- Ensure proper disposal of used batteries.
- Where the MAINS plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
- To reduce the risk of electric shock, do not perform any servicing other than what is mentioned in the operating manual.
- There are no user-serviceable parts inside the TV; do not open the TV casing.

#### IMPORTANT INFORMATION

If a television is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

- Using cabinets or stands recommended by the manufacturer of the television.
- Only using furniture that can safely support the television.
- Ensuring the television is not overhanging the edge of the supporting furniture.
- Not placing the television on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the television to a suitable support.
- Not standing the televisions on cloth or other materials placed between the television and supporting furniture.
- Educating children about the dangers of climbing on furniture to reach the television or its controls.

#### Safe installation

Use the belt fixing the television to facilitate restraining the television from toping forward.

## SAFETY INSTRUCTIONS

---

1. **Read Instructions** - All the safety and operating instructions should be read before the appliance is operated.
2. **Retain Instructions** - The safety and operating instructions should be retained for future reference.
3. **Heed Warnings** - All warnings on the appliance and in the operating instructions should be adhered to.
4. **Follow Instructions** - All operating instructions should be followed.

5. **Water and Moisture** - The appliance should not be used near water.
6. **Cart and Stands** - The appliance should only be used with a cart or stand that is recommended by the manufacturer.
7. **Wall or Ceiling Mounting** - The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
8. **Ventilation** - The appliance should be well situated so that its location or position does not interfere with its proper ventilation.
9. **Heat** - This appliance should be placed away from heat sources such as radiators, heat registers and stoves.
10. **Power Sources** - The appliance should only be connected to a power supply as described in the operating instructions or as marked on the appliance.
11. **Grounding or Polarization** - Precautions should be taken.
12. **Power Cord Protection** - Power supply cord should be routed so that it is not likely to be walked on, pinched by items placed upon it against the cord and its end.
13. **Cleaning** - The appliance should be cleaned only as recommended by the manufacturer.
14. **Power Line** - An outdoor antenna should be located away from power lines.
15. **Outdoor Antenna Grounding** - If an outside antenna is connected to the receiver, the antenna system must be grounded so as to provide against voltages and built-up static charges.
16. **Non-use Periods** - The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
17. **Object and Liquid Entry** - Care should be taken so that objects did not fall, and liquids are not spilled into the enclosure through openings.
18. **Conditions requiring Service** - The appliance should be serviced by qualified service personnel when:
  - The power-supply cord or the plug has been damaged.
  - Objects have fallen on or liquid has been spilled into the appliance.
  - The appliance has been exposed to rain.
  - The appliance does not appear to operate normally or exhibits a marked change in performance.
19. The ventilation should not be impeded by covering the ventilation opening with items, such as newspapers, table-cloths, curtains, etc.  
No naked flame sources, such as lighted candles, should be placed on the apparatus.  
The apparatus shall be connected to mains socket outlet with a protective earthing connection.  
The appliance coupler regard as disconnection device, the disconnect device shall remain readily operable.
20. The equipment may be used in tropical and moderate climates.

## SAFETY INSTRUCTIONS

### Warning

High voltages are used in the operating of this product. Do not remove the back cover of the cabinet. Refer servicing to qualified service personnel.

### Warning

To prevent fire or electrical shock hazard, do not expose the main unit to rain or moisture.

### Warning

Do not drop or push objects into television cabinet slots or openings. Never spill any kind of liquid on the television receiver.

### Caution

If the television is to be built into a compartment or similarly enclosed, the minimum distances must be maintained.

Heat built up can reduce the service life of your television, and can also be dangerous.

### Caution

Never stand on, lean on, push suddenly the product or its stand.

You should pay special attention to children.

### Caution

Do not place the main unit on an unstable cart stand, shelf or table.

Serious injury to an individual, and damage to the television, may result should it fall.

### Caution

When the product is not used for an extended period of time, it is advisable to disconnect the AC power cord from the AC outlet.

### Caution

Avoid exposing the main unit to direct sunlight and other sources of heat. Do not position television receiver directly on other products which give off heat. E.g. Video cassette players, audio amplifiers. Do not block the ventilation holes in the back cover. Ventilation is essential to prevent electrical failure. Do not squash power supply cord under the main unit.

### Caution

The panel used in this product is made of glass. It can break when the product is dropped or applied with force.

Individuals should execute caution when dealing with broken glass should the panel break.

## DESCRIPTION OF CONTROL KEYS & CONNECTORS

### CONTROL KEYS:

| BUTTON NAME         | BUTTON ICON TYPE |   |   |         |         | BUTTON INSTRUCTION                          |
|---------------------|------------------|---|---|---------|---------|---------------------------------------------|
|                     | 1                | 2 | 3 | 4       | 5       |                                             |
| SOURCE BUTTON       | SOURCE           |   |   | INPUT   | INPUT   | To display source menu.                     |

## TROUBLE SHOOTING GUIDE

Many apparent malfunctions are caused slight misadjustments of the regular controls of your unit or equally simple causes. If any difficulty arises through normal use of your unit, check the list of common problems in the list below.

**If the problem persists, unplug your unit and contact your dealer.**

| SYMPTOM                                                      | METHODS OF CHECKING OR ADJUSTING                                                                                                                                                                                                     |
|--------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No picture or sound                                          | Check the AC plug is in the socket. Check house circuit breaker is in the ON position.                                                                                                                                               |
| Picture normal but no sound                                  | Check that the volume is not at its minimum setting or on MUTE.                                                                                                                                                                      |
| Remote control not working                                   | Check that TV set power is ON.<br>Check batteries are operational and inserted correctly.<br>Make sure infrared receiving window on TV is not exposed to strong lighting or blocked in any way.                                      |
| Cannot receive any TV signal                                 | Ensure SOURCE switch is set to TV.<br>Check aerial location and connection.<br>Re-check your tuning method.                                                                                                                          |
| No program signals output from external source               | Check SOURCE button to make sure it is in the correct position for reception.                                                                                                                                                        |
| Contrast and brightness problems                             | Make necessary adjustments to relevant settings.                                                                                                                                                                                     |
| Intermittent poor contrast and colour fading on all channels | Check aerial positioning                                                                                                                                                                                                             |
| Dotted lines or stripes appear on screen                     | There may be Interference from another electrical product. Move appliance if it persists.                                                                                                                                            |
| Snow on screen                                               | Check aerial for broken circuit, loose connection or any visible damage.                                                                                                                                                             |
| Double images or 'ghosting'                                  | Check aerial location and direction - strong winds may cause it to move. Also check whether mountains or tall buildings may be the problem. Minor adjustment of the direction of your antenna should keep the ghosting to a minimum. |

**Note:** External rooftop/antenna adjustment should be left to a suitably qualified person.

## STAND INSTALLATION

**Step 1:** Take out the TV/Monitor and carefully put it (screen downward) on a stable and flat table with a soft cloth or cushion on it.

**Step 2:** Please check to make sure there are the same mark (L/R) on the TV/Monitor back and the correct stand. This step is not available for the stands without any mark on it, or not available for the TV/Monitor with one stand only.

**Step 3:** Fix the stands to the TV/Monitor by fastening the matching screws provided in the box. The stand may vary depending on the region or model.
